## **Thousands of Post-Election Yard Signs Need a Home**

*Altogether Recycling offers to recycle unwanted campaign materials*

DENVER (Nov. 7, 2007) – Altogether Recycling announced today it is encouraging candidates of local elections, both successful and unsuccessful, to gather their plastic yard signs and drop them off at the Altogether Recycling plant at 645 W. 53<sup>rd</sup> Place in Denver.

Coroplast yard signs – made of corrugated plastic -- can be easily recycled, said Brent Hildebrand, vice president of Altogether Recycling. He estimates there were at least 85,000 erected in the Denver area this political season.

“The best way to recycle those signs is for the politicians to store them in their garages and use them again in the next campaign,” Hildebrand said. “Otherwise, we hope they will bring them to us. Those signs should not end up in a landfill.”

Altogether Recycling has established a drop-off point in Arvada at Creative Advertising & Printing, 5840 Old Wadsworth Blvd., for the politicians in that town who prefer a more convenient location. Altogether Recycling welcomes inquiries from other centers that wish to serve as drop-off points for this recycling campaign.

“I hope to re-use a majority of my signs,” said first-time City Council winner Mark McGoff of Arvada, “but a lot of them I will put in a recycling bin, and I encourage my colleagues to do the same. I appreciate Altogether Recycling’s efforts to participate in this important environmental cause. As a newly elected member of the Arvada City Council, I plan to emphasize the benefits of sustainability – and there’s no better time than right now to send a message to the community.”

### About Altogether Recycling™

Denver-based Altogether Recycling is a Colorado owned-and-operated entity committed to working with partners throughout the state. Its cutting-edge technology separates a

wide variety of recyclable materials from a single, mixed stream. Those recyclables include aluminum, cardboard, bottles, cans, newspaper, office paper and some plastics. Substantial amounts of the commodities recovered at the Altogether Recycling facility are resold to local businesses. The new plant at 645 W. 53<sup>rd</sup> Place in Denver gives the recycling community a place to join forces in the effort to divert increasing amounts of material away from landfills. Altogether Recycling is a division of Alpine Waste & Recycling. For information, go to [www.altogetherrecycling.com](http://www.altogetherrecycling.com).
